Data constraints

As a relatively small organization (based off the reporting employee count range) , our ability to report certain pay data is limited by the size and composition of our workforce. Our workforce is predominantly women, which can limit the availability of comparable data across gender groups and may result in insufficient data for certain reporting categories.

Explanatory notes

9. "Pay quartile" refers to the percentage of each gender within four equal sized groups based on their hourly pay.

* In accordance with the Pay Transparency Act and reporting rules designed to protect the anonymity and privacy of respondents, one or more gender categories has been excluded due to insufficient numbers to meet disclosure requirements.
